

HAZARDOUS SUBSTANCES AND DANGEROUS GOODS ASSESSMENTS

Is your organisation meeting their obligations under both the *Occupational Health and Safety Regulations, 2007* and the *Dangerous Goods (Storage and Handling) Regulations, 2000*?

There is a requirement to obtain material safety data sheets for hazardous substances and dangerous goods and conduct assessments in relation to their use and storage.

ERGOSH consultants are able to conduct Hazardous Substances and Dangerous Goods Assessments. The consultant will review the storage and handling of hazardous substances and dangerous goods at your workplace, assess the risks associated with these substances, and provide detailed recommendations as to how these substances should be managed and handled.

If required ERGOSH can provide awareness training and instruct employees on the safe handling and storage of hazardous substances and dangerous goods.

To arrange a Hazardous Substances and Dangerous Goods Assessment in your work place contact ERGOSH Safety Management Services on:
