

IMPLEMENTATION OF HEALTH AND SAFETY MANAGEMENT SYSTEMS

Does your Occupational Health and Safety Management System conform with AS/NZS 4801 or Safety MAP Edition 4?

ERGOSH is able to conduct internal audits of your organisation's safety management systems against a range of standards including SafetyMAP 4th edition or AS/NZS 4801. If required a detailed gap analysis can be conducted and a report provided, highlighting areas of non-conformance and providing recommendations on how to best achieve full conformance.

ERGOSH is also able to assist with the implementation of your safety management system, through developing policies and procedures and providing training to inform and instruct employees how to best implement the recommendations.

This will fully prepare your organization for an external certification audit.

To arrange an Occupational Health and Safety Management System Audit in your work place contact ERGOSH Safety Management Services on:
